

Let Lakehead University's Paleo-DNA Laboratory help you track
down your genetic ancestry:

DNA TESTING \$50*

ALL DAY SATURDAY FEBRUARY 20, 2010 AT INTERCITY MALL

Paternal Ancestry (father's male lineage)
or
Maternal Ancestry (mother's female lineage)

Trace your genetic ancestry through DNA Analysis. Use information within your DNA to find out more about your heritage. This analysis does not look at recent ancestry (a few generations back) but your genetic ancestry when it was first created tens of thousands of years ago. We will develop your DNA profile and predict your ancestral haplogroup. Take the report we provide to start your own investigation into your ancestry. We will also provide a few informative websites as a starting point for your own research.

**For more information
call 343-8877 or come
see us at our booth on
February 20.**

*Save hundreds of dollars off the regular price. We are running this promotion in recognition of Lakehead University's Research and Innovation Week. After February 20th the price for these analyses will return to \$250 - \$400 respectively.
